I drive a truck for a living and the reason i got xm radio was for the benefits of continuous music, constant weather and road updates. I travel coast to coast and it helps me save time when entering a major city knowing where the traffic jams are located in planning my routes to expedite my deliveries. It also allows me to know what the weather conditions are like in the area that I'm traveling thru. Do not allow the NAB petition 04-160 to go forth because the XM radio is the the one source i have to keep me informed to a greater safety degree than the local radio stations ever thought of providing.

Thank you,
Brian Boswell
